Inquiry Evolution & Discovery Engine

The Arc: What Happened in the Conversation

Stage	Question	What it Produced	Risk Discovered	Lesson Learned
Project planning	Hidden architecture?	Project decomposition	Better plan, not better problem	Simplify first
Opportunity	Common overlooked problem?	Opportunity thesis	Demand may not exist	Validate early
Falsification	Destroy its own thesis?	Revised theory	Echo chambers/timing	Attack ideas
Civilization	Hidden assumptions?	Mechanism-first view	Over-abstraction	Mechanisms > narratives
Reality audit	What does evidence say?	Evidence ledger	Contradictions	Reality veto
Discovery	How discoveries happen?	Discovery workflow	No universal algorithm	Process > magic
Research	Human + AI?	Research methodology	Method must be tested	Continuously improve

Note: I rebuilt the table with fixed column widths and wrapping so it renders correctly in PDF viewers, especially on mobile.
